

POS-MET

PRODUCT CATALOGUE

Dear Sir or Madam

Our range of welding tables and accessories represents a combination of solid construction, innovative design, and the reliability you need in welding. From novice hobbyists to seasoned professionals, our tables are designed to meet the expectations of every welding enthusiast.

Regardless of the scale of the project, our welding tables provide a solid and stable work surface. Every detail has been carefully thought out to meet the requirements of a variety of welding applications. Whether it is welding pipes, profiles or more complex parts, our welding tables are ready for any challenge. Durable surfaces, adjustable feet, and ergonomic solutions make your work more efficient and comfortable.

We invite you to discover the various models of welding tables and accessories in our Catalogueue. Whatever your needs and budgets are, we are sure that you will find the perfect table that will become an integral tool in your welding workshop.

Let our welding tables become your indispensable tool to help achieve excellent results. Discover the possibilities offered by our products and be inspired to achieve even greater achievements in the field of welding.

Best regards

Aleksander Pospiech

The logo for POS-MET features a stylized, light blue horizontal bar with four circular holes, resembling a metal beam. Below this bar, the words "POS-MET" are written in a large, bold, light blue sans-serif font.

POS-MET

About Us

POS-MET is a company having considerable experience in the welding industry. The company has been supplying the best professionals with welding tables and accessories necessary for their work for years. By refining the smallest details during the production of tables and ready-made welding sets, POS-MET specialists contribute to the improvement of the activities performed by professional welders.

With a properly selected welding table, the work is not only more comfortable, but also allows you to ensure the precision of the performed welds, which guarantees the final satisfaction of the customers.

Technical parameters

Construction

The welding tables available in our offer are ribbed from the bottom, making them strong and resistant to heavy elements that we plan to put on them. At the same time, ribbed adds rigidity to the structure.

The ideal steel

Most of the welding tables on the market are made of structural steel S355J2 N, which is not subject to hardening or nitriding! According to the opinion of many specialists, nitriding has little effect on the properties of S355J2+N steel.

PERFECT WORKING SURFACES

up to 0.5mm level difference per square meter.

CHAMFER MOUNTING HOLES

Allows of accessories mounting

ADJUSTABLE LEGS HEIGHT

Facilitating work at the right level

ADDITIONAL MOUNTED LEGS ON WHEELS

Allows for comfortable transport

ADDED EXTENSIONS FOR TABLES

To increase working area

FEETS THAT ADAPT TO THE GROUND

work in the same manner regardless of place
